Alexsey Gaidai

SOFTWARE ENGINEER

Profile

My area of expertise is CRM/ERP systems and REST APIs. I work with both frontend and backend, but I have more experience with backend, PHP and databases. I understand OOP principles, design patterns and clean architecture. I have many years of commercial development experience.

Employment History

Full Stack Software Engineer, Aussiedev Consulting, Melbourne

JANUARY 2016 — PRESENT

Developed many projects related to the sale, installation and maintenance of solar panels. Created an API for several mobile applications, as well as the functionality of a mobile application on the web in React. Developed many dashboards and charts using complex database queries.

Full Stack Developer, Kiev

AUGUST 2018 — NOVEMBER 2019

Designed and successfully implemented a system for automatically creating ads from client feeds with subsequent uploading to MCC. All restrictions of Google Adwords were taken into account. Also, this project was used to update the status of ads/groups and prices of online store products using parameters.

PHP Developer, dok.ua, Kiev

OCTOBER 2015 — DECEMBER 2017

Maintained and expanded the capabilities of the internal CRM system in the development team. Designed and developed new modules for working with suppliers, and quick setting of the items characteristics. Integrated the API of "Nova Poshta" and other third-party services. Updated client profile.
